PROFESSIONAL PROFILE

Adept and proactive React Native Developer with three years of experience, specializing in the development of high-performance and user-friendly mobile applications for both Android and iOS platforms. Demonstrated ability to leverage expertise in JavaScript (ES6+), React.js, and various modern libraries to deliver innovative mobile solutions that not only meet but exceed project requirements. Successfully initiated and executed multiple projects from conception through to completion, independently managing all facets of the development lifecycle. Currently seeking to provide contributions to dynamic teams and to develop impactful mobile experiences.

WORK EXPERIENCE

Senior – React Native Developer

2025 – (Working) Sandesh News

- **Sandesh News Mobile App**

Working on the Sandesh News mobile application. Responsible for designing and developing new features, revamping and restructuring the existing codebase for better scalability and performance, and managing the complete mobile app lifecycle from development to deployment. I also mentor team members by providing technical guidance, reviewing implementation approaches, and promoting best practices to deliver high-quality, maintainable applications.

React Native Developer

2024 – 2025 Shivadhin Digital

- **Shopify Mobile App**

A mobile e-commerce solution built with React Native, Shopify Mobile App transforms Shopify stores into fully functional mobile apps. Key features include streamlined checkout, real-time data synchronization, and a user-friendly design.

React Native Developer

2022 – 2024 Ubrain Studios, Rajkot

- **TennisPAL App**

- The TennisPAL application is designed to facilitate the organization of tennis matches, allowing users to map and filter other players based on skill level and geographical location. This platform not only enables individuals to find new friends for tennis through specific location and skill filters but also includes features for engaging in chat conversations, creating groups, and participating in group discussions. For a seamless user experience, various libraries have been employed, notably Stream.io, which facilitates the development of a customizable moments screen similar to Instagram Reels and allows for fully customized chat rooms for both one-on-one and group interactions.

- The application also implements a REST API for uploading images and videos with upload progress indicators, mirroring the functionalities of Instagram. Operating under a paid model, users can subscribe for access to new features using the In-App Purchase (IAP) library. Furthermore, the backend is synchronized to provide push notifications regarding subscription expiration and renewal, enhancing user engagement and management.

- **AFS (App For Store) App | MF-Food APP | Muccii APP – Shopify Mobile App**

Shopify mobile apps! Design magic with themes & colors. Sell smarter, manage on-the-go. Personalize profiles, boost customer love. Find it fast: search, filter, buy with ease. Own your brand: customize screens, listings. Stay informed: orders & favorites at your fingertips. Stunning UI, personalized features, & fast GraphQL APIs. Elevate your e-commerce.

- **Many Other Similar Projects...**

NFT Trade App, Crypto Wallet, Grocery Mart App, Car Rental App, Box Booking.
Game Type Apps : GMR Sita, BSV(RHEAL).
